

# OBJECTIF DRONE

L'ARTISAN DU DRONE

## DRONE CATALOG 2025

+33 (0) 4.65.84.58.66

[richardperez.objectifdrone@gmail.com](mailto:richardperez.objectifdrone@gmail.com)

[www.droneatilla.com](http://www.droneatilla.com)

**OBJECTIF DRONE is the first European manufacturer to offer S3/C5/C6 drones available to everyone right now.**

Four unique drones, capable of handling any conditions in the field of building treatment and pest control. Our drones are priced reasonably and aiming for quick profit!

[YOUTUBE video of the drone range](#)

- **Fast :** Many missions can be operated in one day.
- **Pratical :** No need to use a ladder anymore or a heavy, height-limited telescopic pole system.
- **Secure :** No direct contact with insects or the sprayed products. No more dangerous work from a ladder or scaffolding.
- **Effective :** The small size of our drones and their light weight allow them to get as close as possible to the target, the chosen spraying mode is therefore extremely precise and effective.
- **Ecological :** ARES/ATLAS only spray products where necessary. Less product is therefore needed, more environmentally friendly and better targeted.
- **Increased profit :** Our drones are available at reasonable prices allowing for quick profitability!

**All our drone products are now certified under class C5/C6 and S3. They can therefore be used for STS-01 and STS-02 scenarios anywhere in Europe!**

**Drones from the OBJECTIF DRONE brand are delivered  
“TURNKEY” with all the essential accessories to carry out  
your missions.  
Equipping yourself with high-end drone technology is now  
within your reach!**

---

### **TECHNOLOGY AND EQUIPMENT:**

The drones are built around a frame entirely made of carbon. They are of quadcopter. Our drones are powerful yet small and light in weight, which makes them easy to use, with an exceptional precision and manoeuvrability!

These characteristics specific to our drones allow them to get as close as possible to the area to be treated.

For us, it is essential to have a machine of reasonable size and weight to be able to operate in a "hostile" environment, i.e. constantly close to obstacles (roofs, walls, antennas, trees, power lines, etc.)

### **AFTER SALES SERVICE :**

Our drones are FRENCH made!

Designed, manufactured, assembled and maintained in our two workshops located in Argelès-sur-Mer (66) and La Vernelle (36).

For us, service is as important as the product, so we make a point of providing ULTRA RESPONSIVE after-sales service close to our users.

### **TRAINING :**

The purchase of the drone comes with a mandatory training (5 days - 40 hours). This training is essential and must be carried out in our centers or at one of our partners' center.

# ARÈS EVOLUTION II

[YOUTUBE video of the drone range](#)

**Synonymous with versatility**, the *Evolution* product line offers numerous possible activities. They are equipped with a parachute, allowing them to evolve without a "tether" (unlike the "CAPTIF" drones). The drone is also equipped with a dual RTK positioning system to guarantee stabilisation in intense electromagnetic environments (presence of iron, cladding, etc.).

On its own, it can be used for any mission, no matter the area!

- Low pressure spraying
- High pressure spraying
- Disinfestation (bead launcher, spraying, on-board tank)

**ARES IS THE MOST VERSATILE DRONE AVAILABLE**, and is the only one with the regulatory capacity to carry out all types of mission, whether in built-up areas or the countryside, for spraying buildings, pest control or agricultural treatments.

Sold with: fixed low-pressure boom / nozzle / 1 battery

## **Technical specifications :**

### **ARES - Quadcopter:**

EU classification: C5/C6

Usage: Disinfestation / Low & High pressure cleaning / Trichogramma release

Size: 62x62x58cm

Empty mass: 3,5Kg

Battery: 6s 16500 Mha 1500g

Endurance: 30 minutes - no payload/ 25 minutes - low pressure / 15 minutes - high pressure

Retail price excl. VAT: €8,900

# CHRONOS DRONE

[YOUTUBE video of the drone range](#)

CHRONOS is born from our users' need: a drone solely dedicated to spraying with very long endurance (35 minutes spraying). An exclusively tethered drone, light and easy to handle, the essential partner for the building cleaning professional!

Thanks to its powerful motors and its latest generation controller allowing formidable stability, **CHRONOS is capable of spraying at low AND high pressure** in any difficult-to-access location, even above 50 m. The drone is also equipped with a dual RTK positioning system to guarantee stabilisation in intense electromagnetic environments (presence of iron, cladding, etc.).

**CHRONOS IS THEREFORE THE SPRAYING DRONE** for any type of surface (cladding, roof, solar panel, facade, etc.).

Sold with: fixed low-pressure boom / nozzle / 1 battery

## **Technical specifications:**

### **CHRONOS - Quadcopter :**

EU classification: S3 / C5 Tethered

Usage: Low pressure spraying / High pressure spraying

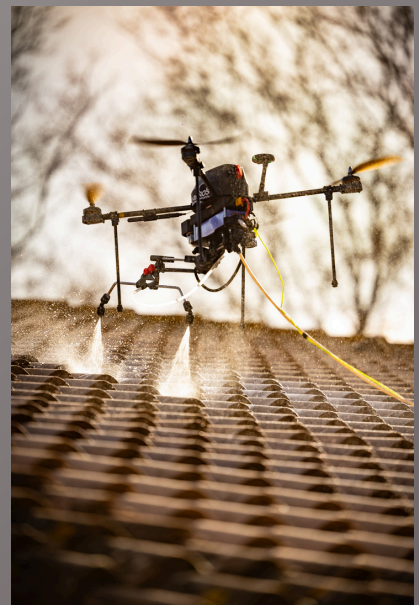

Size: 62x62x42cm

Empty mass: 2,4Kg

Battery: 6s 16000 Mha 1500g

Endurance: 50 minutes - no payload/ 35 minutes - low pressure/ 25 minutes - high pressure

Retail price excl. VAT: €7,600

# MINI CHRONOS DRONE

[YOUTUBE video of the drone range](#)

Designed for indoor and outdoor flying, Mini Chronos is equipped with the same cutting-edge technology as its big brother Chronos. This smaller model allows access to confined areas while maintaining the same cleaning performance.

Mini Chronos is mounted with a standard rotating sprayer.

## **Technical specifications:**

### **MINI CHRONOS - Quadcopter :**

EU classification: S3 / C5 TETHERED

Usage: Low pressure cleaning / Non-interchangeable standard equipment (swivel boom) (optional dual nozzle)

Size: 52x52x29cm

Empty mass: 2,2Kg

Battery: 4s 6500 MAh

Endurance: 20 minutes

Retail price excl. VAT: €4,900

# MANTA

Ever higher, ever more powerful!

Overpowered and lightweight, this drone is designed for professionals in the construction industry.

It has a very high payload capacity, which means it can carry more spraying hose, whether low or high pressure, enabling it to work at great heights (50m and more).

Manta is therefore capable of lifting a 10kg load - a tank, for example!

Manta's versatility is growing all the time, and even though its primary missions are in the building industry, it is already capable of taking on insect control, carrying various loads, sensors, agricultural spraying and dropping...

## Technical specifications:

### **MANTA - Quadricopter :**

Classification: C5/C6

Usage : Insect control / Low pressure pressure cleaning / High pressure cleaning / Agricultural dropping

Dimensions : 62x62x58cm

Empty weight : 5 Kg

Carrying capacity : 10 Kg

Battery: 6s 16000 Mha 1500g (requires two batteries)

Autonomy: 35 minutes empty/ 30 minutes low pressure/ 25 minutes high pressure

Retail price excl. VAT: €12,900

(pack including various options)

## COMPARATIVE TABLE

## **ACCESSORIES AND OPTIONS**

## LOW PRESSURE KIT :

**Targets:** All treatments, spraying

**Use:** This steerable boom can be used to effectively treat all areas that are difficult to approach with the drone (chimneys, gutters, etc.) and, in general, all types of mission requiring spraying upwards or downwards, and at different angles (remotely adjustable via a knob on the radio control unit). This boom can be remotely adjusted to a horizontal or vertical position.

### Benefits:

- Can be sprayed vertically or horizontally
- Much greater surface area treated in a single pass (3m)
- Spraying away from the drone (less return spray)
- Boom can be switched back to horizontal from a distance
- Possibility of spraying upwards (30° angle)

**Price: €790 excl. VAT**

VERTICAL POSITION

HORIZONTAL POSITION

## HIGH PRESSURE KIT :

**Targets:** cold AND hot water rinsing

**Use:** high-pressure spraying boom (110 bar).  
Very useful for cold and hot water rinsing of cladding and facades

**Benefits:** powerful mechanical action!

**Price:** €590 excl. VAT

**Adjustable model:** €990 excl. VAT

## INSECTICIDE BEAD PRESSURE GUN:

Only compatible with the *Evolution* range.

**Targets:** Hornets, nest marking etc.

**Use:** Aluminium barrel containing up to 15 beads (filled with active liquid) with air pressure release. The system is identical to that for powder (see above). The system is triggered via a 12 v solenoid valve controlled remotely by a switch on the radio remote control.

**Observations:** The power of the shot (over 10m with 3 bars of pressure) makes it possible to hit the target precisely while remaining at a distance. The balls (up to 15 at a time in the barrel) explode inside the nest, dispersing the active liquid product. The system can also be used to launch paint balls to mark previously treated nests. The intervention time is very short (less than 3 minutes).

**Benefits:** VERY precise (no paintballs scattered in the wild, unlike paintballs which shoot from the ground away from the nest). The active product is dispersed inside the nests after the paintballs have exploded, giving a long flight range, freedom of movement and rapid deployment. The power of the shot makes it possible to reach all nests, including those deep in the heart of trees, whatever their location.

**Price: €650 excl. VAT**

## 4K CAMERA:

Equip your drone with a second camera, this one in 4K!  
This system allows you to capture high-quality photos/videos on your European-class drone\*, transforming your cleaning drone into a camera drone.  
Slide-on mounting system.

**Price: €590 excl. VAT**

\*Reminder: European regulations require the use of a class C5 and/or C6 drone in order to fly in restricted areas (urban areas, military zones, airport zones, etc.).

This requirement applies regardless of the activity (cleaning or photography).

## **On-board fuel tank (750 cc):**

Compatible with Ares and Manta drones.

Equip your drone with a 750 cc onboard tank.

This system is extremely useful for reaching small areas that are difficult to access with the hose.

Advantage: With this onboard system, you can do without the spray hose!

**Price: €590 excl. VAT**

## TRICHOGRAMMA RELEASE SYSTEM :

Only compatible with the *Evolution* range.

**Use:** missions are automatic. The drone's path is programmed before the flight, on the remote control, according to the configuration of the field to be treated. The system communicates with the dropping system, which then automatically triggers releases at regular intervals (usually every 10m)

At the end of the flight, the system generates a report to check whether the entire field has been treated. In the event of an untreated area, the report specifies the GPS coordinates and will treat the untreated area automatically

**Benefits:** The future of agricultural processing! A fast-growing business that's set to expand rapidly

**Price: €1,290 excl. VAT**

## **AUDIO BROADCASTER :**

Only compatible with the *Evolution* range.

**Objectives:** Bird scaring, broadcasting, messages...

**Use:** A system for broadcasting multiple audio files, triggered by a switch on the remote control. The module is clipped onto the drone

**Flight time:** Up to 15 minutes

**Benefits:** Scaring is done as close as possible to the birds, making it much more effective than a fixed system

**Disadvantages :** None!

**Price:** €490 excl. VAT

**RELEASE BOX :**

Only compatible with the *Evolution* range.

**Targets:** dropping of various phytosanitary products BUT, above all, enabling new and original events to be developed with local authorities, works councils and festival committees (candy dropping, rose petals for weddings, etc.)

**Use:** Variable-capacity canister (up to 2kg), with hatch opening via radio control switch. The contents of the box can be jettisoned in 2 stages

**Duration of flight:** Varies according to weight on board

**Price:** €450 excluding VAT

## PROPELLER GUARDS:

**Targets:** Avoid sudden stoppage of one or more propellers in the event of contact with an obstacle (branches, walls, chimney, etc.)

**Use:** Can be unclipped at will, depending on the type of mission

**Observations:** Protective grids push back branches and delay contact. This option is adaptable to ARES drones

**Benefits:** Essential... at least at the start of your business!

**Price:** €150 excl. VAT

## Batteries and chargers:

(for autonomy see comparative table)

### LIPO 4s 6500 Mha:

Compatible with Atlas Evolution; Arès Evolution; Chronos MINI

**Price:** €95 excl. VAT

### Lion semi solid 6s 16000 Mha:

Chronos compatible

**Price:** €480 excl. VAT

### Ultra-fast charger for semi solid Lion:

Full charge in 45 minutes for 2 batteries

**Price:** €480 excl. VAT

## MC18 COMET SPRAY PUMP :

**Pressure:** 15 bar (low pressure) for acidic products!  
Equipped with a remote release system.

**Price:** €850 excl. VAT

## SPRAYING CART :

Dimensions: 65 x 150 x 67 cm

This system is quick and easy to set up on a construction site.

Several models are available (standalone pump or mains-powered pump).

**Trolley + 70L tank** (without pump): €400 excl. VAT

**Trolley + 70L tank + 20 bar mains-powered pump:** €891 excl. VAT

**Trolley + 70L tank + 12V 10 bar stand-alone pump\*:** €1024 excl. VAT

\*battery-powered system / 4 hours of autonomy / 9 hours of recharge / can be used with mains power (220V)

## BOX :

- MINI CHRONOS : €650 excl. VAT
- CHRONOS : €700 excl. VAT
- ARES : €750 excl. VAT
- MANTA : €900 excl. VAT

**OBJECTIF DRONE**
